EDUCATIONAL BACKGROUND

Sep 2014 – June 2020 **Doctor of Medicine (GPA: Good 2.63)**
The Hashemite University, Zarqa, Jordan

August 2014 **General Secondary Education Certificate (GPA: 95.1%)**
National Orthodox School/ Shmeisani Amman, Jordan

2009 - 2011 **French to Speakers of Other Languages (DELF) (DELF A2 level)**
Institut Français – Jordan

PRACTICAL EXPERIENCE

Aug 2021 – Current **General Practitioner in GP practise at St. Luke's Medical Center**
Saint Luke's Orthodox Medical Association, Amman, Jordan

- I have worked 40 hours per week alongside a senior supervisor and nursing staff.
- I have managed an average of 10 patients per day including both adults and paediatric patients.
- The most common complaints that I have managed included chest pain, shortness of breath, headaches, and muscle pain for adults, and fever, sore throat, dehydration, and bronchiolitis for paediatrics.
- I start the assessment by taking history, performing physical examination, requesting laboratory investigations and performing relevant basic procedures such as: IV cannulation, Venipuncture, ECG interpretation, IM injections, and Nasopharyngeal and oropharyngeal sampling.
- Management depending on the diagnosis, reassuring, conservative approach when appropriate and referrals to specialists for confirmation and further management if needed
- Patient education and counselling such as in Diabetic Patients and Smoking cessation discussions for smoker etc.

July 2020 – July 2021

Internship (FY1)

Royal Medical Services, Amman, Jordan

- Post-graduate internship year (FY1 Equivalent)
- King Hussein Medical Centre – Royal Medical Services is the largest tertiary referral hospital in Jordan that serves a population of 4 million people in the capital city of Amman and referrals from other cities with 1400 beds.
- The internship year was divided into: 3 months of internal medicine, 3 months of surgery, 2 months of paediatrics, 2 months of OBS&GYNE, 1 month of emergency medicine, 1 month of elective training in radiology (an average of 40 hours per week).
- My role was to work closely with the training fellows to help in the management of an average of 10 inpatient cases per day. I have been involved in the assessment process by taking history, performing physical examination, discussing appropriate lab investigations and management with the training fellow, writing progress notes and maintaining up to date and accurate patients digital records.
- I have been involved in extra clinic work with the consultants where I had the chance to examine patients and discussed the cases with the consultant.
- I have also been involved in observing surgeries such as thyroidectomy and cholecystectomy, and procedures such as endoscopies, colonoscopies, cardiac catheterization, cardioversion, and bronchoscopies.

April 2020 – June 2020

National COVID-19 Epidemiological Investigation Program (Volunteer)

Jordan Medical Association, Amman, Jordan.

May 2019 – July 2019

Elective Training

West Hudson Medical Group, North Arlington, New Jersey.

Clara Maass Medical Center, Critical Care and Pulmonary Department, Belleville, New Jersey.

- Assessing patients and documenting detailed progress notes, participating in the treatment plan discussions.
- Participating in morning and afternoon rounds, presenting cases in morning reports.
- Observing procedures such as “endotracheal intubation”.

RESEARCH & PUBLICATIONS

The prevalence and risk factors of chronic back pain among The Hashemite University students.

- Cross-sectional study
- (Co-author) Participated in literature review, data acquisition, data analysis, writing and editing the manuscript
- Aims to investigate the prevalence and related risk factors of chronic low back pain among university students at Hashemite University at Al-Zarqa city, Jordan. Decision-makers at the university can use the data to reduce the burden of low back pain among students.
- Multiple expected and unexpected risk factors for chronic back pain were identified. Data can be used to raise the quality of the university facilities.
- Publication accepted in the Journal of the Royal Medical Services on 22/10/21
- Presented as conference abstract at the 3rd International Medical Conference of the Subcommittee of Jordan Medical Association
