Hobbies & Interests

Throughout my life, I cultivated healthier, stress-relieving pastimes such as running, reading, and watching movies , prioritizing activities that promote both physical and mental well-being. Watching series and films not only entertains me but also helps me understand different cultures and norms.

Certifications**Other Certifications:**

Advanced Cardiovascular Life Support.: Sep, 2023 - Sep, 2025

Basic Life Support.: May, 2023 - May, 2025

Experiences**Clinical extern**

Corewell (Beaumont) Dearborn, Corwell Wayne hospitals and ARK Cardiovascular and Arrhythmia Center. 02/2024 - 04/2024

Education/training Detroit, Dearborn and Trenton., MI

During my externship across different hospitals in Michigan, I gained exposure to a diverse patient populations and healthcare professionals in outpatient and inpatient settings.

- In inpatient settings, I participated in rounds on hospital floors and in the CCU. We provided cardiology consultations and observed advanced catheterization laboratory procedures.
- Before rounds, I reviewed each patient's case with a physician assistant. After rounds, I discussed each case with the cardiologist and the supervising team.
- In the outpatient setting, I reviewed patients' files, examined the patients, and documented their medical history.
- I in-formulated treatment plans through collaborating with the medical staff responsible for data entry.

Most Meaningful - It was an enriching experience as it was my first time working in the US healthcare system. I interacted with patients from different backgrounds, which honed my professionalism and bedside manners. Each case was a valuable learning opportunity to identify areas where I can improve.

Curriculum Vitae

Anesthesia resident.

Abdali Medical Center.
Work

08/2023 - 12/2023
Amman, Jordan

Abdali Medical Center is the largest multi-specialty hospital in Jordan's private sector, offering advanced care across a wide range of specialties.

- I gained essential experience in pre-operative assessments and intraoperative managements.
- I conducted thorough pre-surgery evaluations and developed personalized plans.
- I participated in critical care rounds, monitored patients in the CCU, and responded to emergencies, including cardiac arrests and respiratory failures.
- I performed medical procedures such as NG tube insertion, endotracheal Intubation and drawing arterial blood gas samples.
- I gave morning seminars about critical care topics to my colleagues regarding management of critical care patients in the CCU.

Most Meaningful - Rotations with different specialties and being on call made me encounter and manage challenging conditions. I had excellent mentorship that provided me with the aptitude to excel while preserving my space of independent practice. It also provided me with new perspectives on different specialties.

Medical volunteer.

Ministry of health.
Volunteer/service/advocacy

03/2021 - 06/2021
Amman, Jordan

During the second COVID pandemic lockdown, the Ministry of Health offered medical students an opportunity to volunteer in vaccination and COVID-19 screening teams.

- I was part of a team that went to rural areas.
- My role was administering COVID-19 vaccines and taking nasal swabs for screening.
- Referred any necessary case to the hospital.
- Delivered monthly medications refill for patients with chronic medical illnesses.
- Assessed patients with simple medical problems through home visits, and performed simple procedures (i.e., wound dressing, IM Injections, etc.).

Most Meaningful - Volunteering in rural areas deepened my commitment to society by showing me the healthcare gaps people face. Helping others made me more empathetic and compassionate. This experience inspired me to work towards better healthcare access for underserved communities and make a meaningful difference.

Resident physician (general practitioner)

Royal Hospital.
Work

08/2024 - Present
Amman, Jordan

Royal Hospital is a large multi-speciality private hospital which provides advanced healthcare for patients from different age groups.

My duties include:

- Taking history and performing comprehensive physical examination.
- Developing assessments and treatment plans, ordering laboratory or radiological investigations, and medications accordingly.
- Arranging for discharges and follow-up care.
- Educating and counseling patients regarding different aspects of their health like disease processes, test results, and ongoing treatment.
- Documenting all of the above by writing admission notes, progress notes, and discharge summaries.
- Performing simple medical procedures such as NG tube insertion and inserting Foley's catheters.

Clinic extern

Ascension St. John Hospital and Afib wellness services clinic Roseville Office
Education/training

04/2024 - 04/2024
Detroit., MI

Curriculum Vitae

Clinic extern

During my rotations. I gained extensive experiences in both inpatient and outpatient cardiology settings.

- I honed my clinical skills by participating in taking history from patients and performing physical exams.
- I observed multiple advanced cardiology procedures, and attended multiple cardiology department morning meetings, which deepened my understanding of current practices and innovations in the field.
- These rotations solidified my passion for cardiology and enhanced my practical knowledge.
- I offered interpretation services for Arabic-speaking patients and familiarized myself with the EPIC Medical System.
- I actively participated in journal club meetings, engaging in discussions about clinical trials in advanced cardiology.

Clinical extern.

Abdali Medical Center. Hajjiri Healthy Hearts Clinic.

01/2024 - 01/2024

Education/training

Amman, Jordan

During my clinical externship with Dr. Hajjiri.

- I gained valuable hands-on experience in cardiac care and management.
- I observed and assisted in electrophysiology studies, catheter ablations, and pacemaker insertions. My responsibilities included conducting initial patient assessments, performing physical exams, and reviewing diagnostic tests.
- The clinic emphasized patient education and clear communication.
- Engaging in case discussions deepened my knowledge in the field of cardiology.
- This externship solidified my passion for cardiology, and laid a strong foundation for my future career.

Researcher

Faculty of Medicine - Jordan University of Science and Technology (JUST)

05/2023 - Present

Research

Irbid, Jordan

In the process of conducting a research, I begin by preparing myself to be fully oriented to the type of research we have in mind. If it were a case report, I would ensure accurate and comprehensive documentation of the clinical case, which includes all relevant patient information, medical history, diagnostic findings, and treatment details. If it were a meta-analysis, I would begin by defining the research question and identifying relevant studies within the literature for our further evaluation. Afterward, team sessions are conducted on a weekly basis to brainstorm and provide feedback to each other. My hope is to provide valuable insights that contribute meaningfully to the medical community's knowledge and understanding.

Medical intern.

Al-Karak Governmental Hospital/ Ministry of Health

07/2022 - 07/2023

Education/training

Al-Karak, Jordan

The Ministry of Health is the largest public health care sector in Jordan.

- During my internship I rotated in the majors of medicine (Internal Medicine, Surgery, OB/GYN, and Pediatrics) and Emergency Medicine.
- Assisted residents in the ER department.
- Triage, evaluated, all patients in the emergency department.
- Supervised medical students who rotated at the hospital.
- Obtained brief medical histories, performed concise physical exams, and wrote short patient notes.
- Ordered diagnostic tests and imaging studies, established differential diagnoses, interpreted test results, and developed appropriate emergency management plans.
- I Performed medical procedures including venous and arterial punctures.

Tutor

Trust academy.

02/2022 - 06/2023

Teaching/mentoring

Al Karak, Jordan

Curriculum Vitae

Tutor

I tutored medical students and graduates during my internship.

- After graduation I started online tutoring medical students and graduates from different universities with Trust Academy.
- I provided mentoring services for USMLE preparation, internship exams in Jordan, and challenging topics for international medical graduates, such as ethics and communication skills.
- I collaborated with friends to provide free tutoring to financially disadvantaged medical students.
- I offer private tutoring in basic and clinical sciences to further support my financial independence.

Organizer.

Flying Doctors of America
Volunteer/service/advocacy

09/2017 - 09/2017
Al-Mafraq, Jordan

Flying Doctor of America is a non-profit organization that brings team of physicians, dentists, nurse and other health care professionals to care for people who wouldn't receive medical care.

- As part of a one-week medical mission in collaboration with the Flying Doctors of America. We contributed to a significant humanitarian effort.
- The mission aimed to provide free medical care to refugees in Jordan, offering physical and emotional support to those enduring harsh conditions.
- We worked to break down cultural and background barriers between medical students and refugees with emphasising the importance of humanity in medicine.
