- Prescribed medical treatments and diagnoses to Covid-19 patients.

AlJawhara Medical Clinic – General Practitioner

Jan. 2019 – Oct. 2020

- ✚ I served as the primary healthcare provider for individuals and families, offering comprehensive medical care across all age groups.
- ✚ I conducted routine health check-ups, performed physical examinations, and managed common medical conditions such as respiratory infections, allergies, hypertension, diabetes, and other chronic illnesses.
- ✚ My role involved building strong doctor-patient relationships, fostering trust, and ensuring personalized care to meet the unique needs of each patient.
- ✚ I provided health education and preventive counseling, empowering patients to adopt healthy lifestyle habits and make informed decisions about their well-being. Collaborating with other healthcare professionals within the clinic, you coordinated patient care, referrals, and follow-ups to ensure continuity of medical treatment.
- ✚ I managed patient medical records, maintained up-to-date documentation, and adhered to the highest standards of medical ethics and confidentiality.

Prince Hamza hospital – Medical Internship

Jan. 2018 – Jan. 2019

Surgery: During this rotation, I was exposed to various surgical specialties, assisting senior surgeons in operations, learning about pre-operative and post-operative care, and gaining insights into surgical procedures for different medical conditions.

Gynecology: In this rotation, I worked with experienced gynecologists, learning about women's reproductive health, prenatal care, managing gynecological conditions, and assisting in procedures such as Pap smears and prenatal check-ups.

Internal Medicine: In the Internal Medicine department, I was involved in the diagnosis and management of a wide range of medical conditions. I learned about patient assessment, treatment planning, and the use of diagnostic tools to evaluate complex medical cases.

Pediatrics: I was exposed to the unique medical needs of children. I gained experience in child healthcare, immunizations, growth monitoring, and the management of pediatric illnesses.
