EXPERIENCE

Intern physician
Jordanian Royal Medical Services, Amman.
07/2023 - 07/2024

Worked as a part in multiple multidisciplinary teams, the teams ideally consisted of a consultant, 1-2 specialists, 1-2 fellows, 1-2 residents, and an intern physician, my responsibilities included, taking ABGS, inserting IV's, Foley catheters, scheduling consults with different departments, and following up on the patients during prerounds.

My Elective training took place in the orthopedics department, to consolidate my knowledge and to have the ability to deal with trauma in a higher standard, I had learned how to diagnose fractures more effectively, reduce fractures, and to splint fractures, close wounds more effectively, and diagnose tendon and nerve injuries.

EDUCATION

Jordan University of Science and Technology, Ramtha.
2017- 2023

Trained at most of the governorates in the North of Jordan, including Irbid, Ramtha, Ajloun, and Mafraq.

My Training consisted of theoretical medicine, and practical medicine; The theoretical plan consisted of the 9 basic systems of the body, while my practical plan was divided into the 4 majors, 2 sub-majors, and all 9 minors, had the opportunity to attend in every single department in the hospital, learning how doctors with different specialties approach diseases similarly and differently.

Elective Training

Cleveland Clinic Abu Dhabi, UAE.

10/2022 - 12/2022

Cardiology: It was a great experience, I got introduced to the highest level of medicine the world has to offer. I have also learned how to read research papers, and guidelines to take appropriate action for the patients. I was also tasked to look up countless pieces of information and present it to the residents, fellows, and consultants.

Emergency: Learned how to stitch, remove stitches, clean postoperative wounds, and seeing patients, diagnosing, and discussing the differentials and the treatment plan with the consultants.

Extracurriculars

- KCNMA1 Gene Epilepsy Research (In progress).
