To Whom It May Concern

With great pride and honor, we, the management of Arab Medical Center, represented by its General Manager and Medical Director, give this recommendation letter regarding Ata'o Allah Mohammad Attallah Altawaiha; a senior house officer at Arab Medical Center.

We found Ata'o allah to be a unique clinician who was smart and eager to arm himself with the abilities and information required to give his assigned patients the best care possible. His diagnostic confidence, succinct yet effective physical examinations, and sound reasoning during team discussions demonstrated an in-depth of knowledge of both basic and clinical sciences. What stood out were Ata'o allah's innate curiosity, desire to learn about medicine, and ability to make the best use of available resources. He frequently stayed up late to check on patients, helped with pre and post operation preparations , and put a lot of work into creating complex yet research-supported management plans.

With regards to his attitudes and personality, Ata'o allah has proven, countless times, that he is a hard-working, trustworthy, and compassionate medical practitioner. Amidst all the clinical scenarios upon which he had to make an efficient decision; patients were always appreciative of his efforts due to the empathic bonds of rapport that he seamlessly forms with whomever is assigned under his watch. Moreover, his dedication can be no better exemplified than through his adherence to time and the ability to mold constructive criticism into meaningful changes in his practice. His work ethic has gotten him the praise and admitation of his peers, supervisors, and nearly every patient that he interacted with. Time and time again, Ata'o allah had proved that he is an evolutionary and modern practitioner that is able to adapt to any clinical workplace Irrespective of its difficulty or demand.

Sincerely yours,

Dr. Saad Samarah, MD

Medical Director

General Surgeon
